**MAX's Forecast Management Solution for Microsoft Dynamics CRM is a robust tool that enables sales executives and operations teams to develop detailed sales forecasts to support the Sales and Operations Planning (S&OP) process.**

By using this solution companies can support the design win lifecycle - from samples management to design registration and through to Design Win and Sales Forecasting. Design Win and Samples Management for Microsoft Dynamics CRM includes distributor and manufacturer rep portals that enable a seamless coordination between the production and distribution network. It also supports the ability to track and assign the right contract manufacturer (ODM) and end customer, often an OEM manufacturer. This solution is built upon the Microsoft Dynamics CRM platform and can be integrated into any ERP to seamlessly in pull pricing and push out orders from closed opportunities.

Using this solution, companies can combine the sales pipeline of new business with sales forecasts of current customers and sales wins for robust forecasting. This solution also provides a view into the actual revenue and netted for billings, bookings, and backlog.

Not only does MAX's Forecast Management solution for Dynamics CRM provide a clear view into sales revenue, it streamlines and automates the entire forecasting process. Companies can save time, increase accuracy and reduce the excess inventory that results from poor planning.

With MAX's Forecast Management Solution for Microsoft Dynamics CRM, sales leaders can leverage rich, interactive and drillable graphical representations of sales forecasts displayed in pie charts, line graphs and bar charts to support a wide variety of complex forecasting needs, including:

- Forecast by customer, product, opportunity, territory, direct vs channel and much more
- Top down or bottom up forecasting
- Forecast by revenue, parts quantity, or both
- Budget to forecast analysis and comparisons
- Forecast to Forecast period comparisons
- Forecast to actual revenue accuracy measurement
- Visibility of distribution channel inventory and sell through forecasts
- Direct and distributor views of sales for a total global forecast
- Includes manager override capabilities

# Features and Screenshots from the Forecast Management Solution for Microsoft CRM

Forecast management provides Dynamics CRM users the ability to spread the value of an opportunity out over an extended period of time to provide more accurate monthly forecasting planning.

Using advanced pivot table functionality, our forecast management solution operates in real-time. This enables users to slice data as needed and filter for desired content.

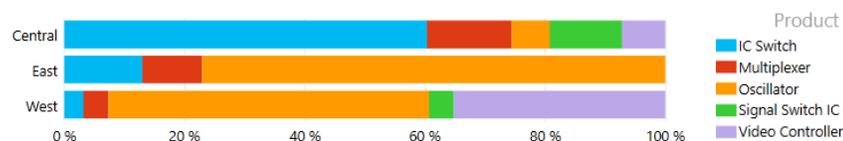

Forecast vs actual revenue amounts can also be shown in an animated representation over time. By pressing the “play” button, users can watch forecasted revenue grow or shrink over time.

## Distributor Forecast vs Actual Revenue

Forecast Revenue, Actual Revenue, and Actual Revenue by Distributor

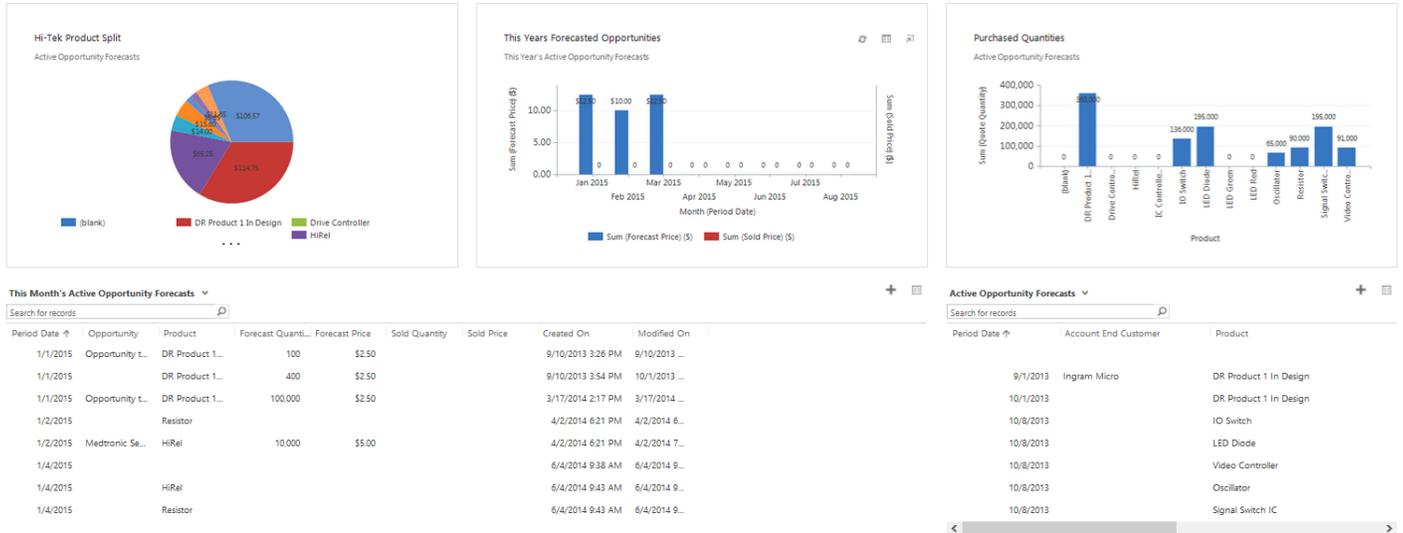

Forecast Revenue by Territory, and Product

Microsoft Dynamics CRM dashboards can be utilized to show forecasts by product, forecasts by month, and detailed lists of itemized forecast numbers that can be modified with in-grid editing. Users can start out with a high-level view and then drill into specific pieces of information for a detailed look into individual data sets.
